

**IN THE SPECIFICATION**

Please replace the paragraph beginning at page 2, line 27, with the following rewritten paragraph:

The power supply terminals 102, 202 and 302 and ground terminals 103, 203 and 303 are provided independently of one another. The power supply terminals 102, 202 and 302 are connected to terminals 602, 604 and 606 of an ESD protection network 601 via power supply wires 501, 503 and 505, respectively. The ground terminals 103, 203 and 303 are connected to terminals 603, 605 and 607 of the ESD protection network 601 via power supply wires 50, 504 and 506, respectively. In FIG. [[5]] 7, R1, R2, R3, R4, R5 and R6 denote parasitic resistors of the power supply wires 501, 502, 503, 504, 505 and 506, respectively.
